The Seldon WaterStick is a personal water purification device. Built with Seldon’s Nanomesh™ Purification Technology, the next generation in water purification, the WaterStick X300 and X100 are simple and easy to use. They deliver safe, great-tasting water immediately, without the use of chemicals, heat, or power. The Seldon WaterStick comes in 2 sizes. The larger 300X weighs less than a pound. The smaller 100X is designed for short-term, emergency situations. Both can be attached to a water bladder, or you can drink from them directly. Durability and versatility make the WaterStick ideal for military, disaster relief, or any outdoor use.

Benefits

- Great taste
- No power
- No chemicals
- Light weight
- Rugged casing
Safe.

- Seldon Nanomesh™ Purification Technology removes 99.9999% of bacteria; 99.99% of viruses and 99.9% of cysts while significantly reducing metals like mercury and lead.
- Nanomesh reduces sediment, chlorine and total organic carbons (TOCs) while preserving healthy minerals.
- Seldon Nanomesh Purification Technology produces water that exceeds USEPA Drinking Water standards.

Simple.

- Easy integration with any hydration pack.
- Drink directly from the source or from your hydration pack.

Now.

- Pure, great-tasting water immediately
- Point-of-use
- Portable

Notes

- U.S. patent numbers: 7,211,320; 7,419,601; 7,682,654 and 7,815,806.

Specifications

The Seldon WaterStick X300
- Capacity: 1,134 liters (300 gallons) for municipal, well or treated water, or microbiologically contaminated Reverse Osmosis Water Purification Unit (ROWPU); 50 liters (13 gallons) for highly contaminated water.
- Flow rate: 100—200 ml (3.4—6.8 ounces) per minute, depending on water quality.
- Water Pressure: 0.8 to 3.0 PSI (0.05 to 0.2 bars).
- Dimensions: 11.3” x 2.1” (29 cm x 5.3 cm) diameter w/o hose barbs.
- Weight: 0.6 pounds (275 g) dry, 1.1 pounds (475 g) wet.

The Seldon WaterStick X100
- Capacity: 378 liters (100 gallons) for municipal, well or treated water, or microbiologically contaminated Reverse Osmosis Water Purification Unit; 20 liters (5 gallons) for highly contaminated water.
- Flow rate: 100—200 ml (3.4—6.8 ounces) per minute, depending on water quality.
- Water Pressure: 0.8 to 3.0 PSI (0.05 to 0.2 bars).
- Dimensions: 7.28” x 2.1” (18.5 cm x 5.3 cm) diameter w/o hose barbs.
- Weight: 0.4 pounds (181 g) dry, 0.67 pounds (304g) wet.

Scissors or knife required to cut tubing.
